

IT for Business

IT'S WHAT WE SPECIALISE IN

**Behind every business
is infrastructure.**

**Behind infrastructure
is technology.**

**Behind technology
is Creative Networks.**

"Thank you for your interest in Creative Networks. There's a lot we'd like to tell you about our company and services. We could go on about our staff, technical skills and all the things we do, but in short we make IT work so you can concentrate on your business. Everything we do is centred around the needs of our customers and in this respect we strive to ensure the level of service and support we provide is the best it can be. I would be pleased to have you join us, so we can support, guide, and help you through the challenges of business and to help you achieve your goals."

Shakeel Ahmed
Managing Director

Every company should plan for potential disruption. An effective recovery procedure can significantly reduce the impact on your productivity, revenue and customers, should the worst happen.

vmware

Business Continuity ensures your company can continue to operate should the worst happen. Disaster Recovery is what we do as a follow up.

How safe is your data?

Reduce your carbon footprint, power consumption and cooling requirements by consolidating your servers, which also gives you a greater range of Disaster Recovery options.

Only 5-15% of a server's capacity is utilised. The solution to this is Virtualisation. By consolidating multiple servers on to fewer physical servers, greater flexibility can be achieved whilst significantly reducing costs.

Maximise efficiency

With Office 365 there are no upfront costs and you have access to the latest upgrades. Achieve enterprise grade IT and Email at a fraction of what it would cost to run in-house.

Get access to the most up to date applications such as Word, Excel, PowerPoint, Outlook and Access. You will also have access to corporate services such as Microsoft Exchange, SharePoint and CRM.

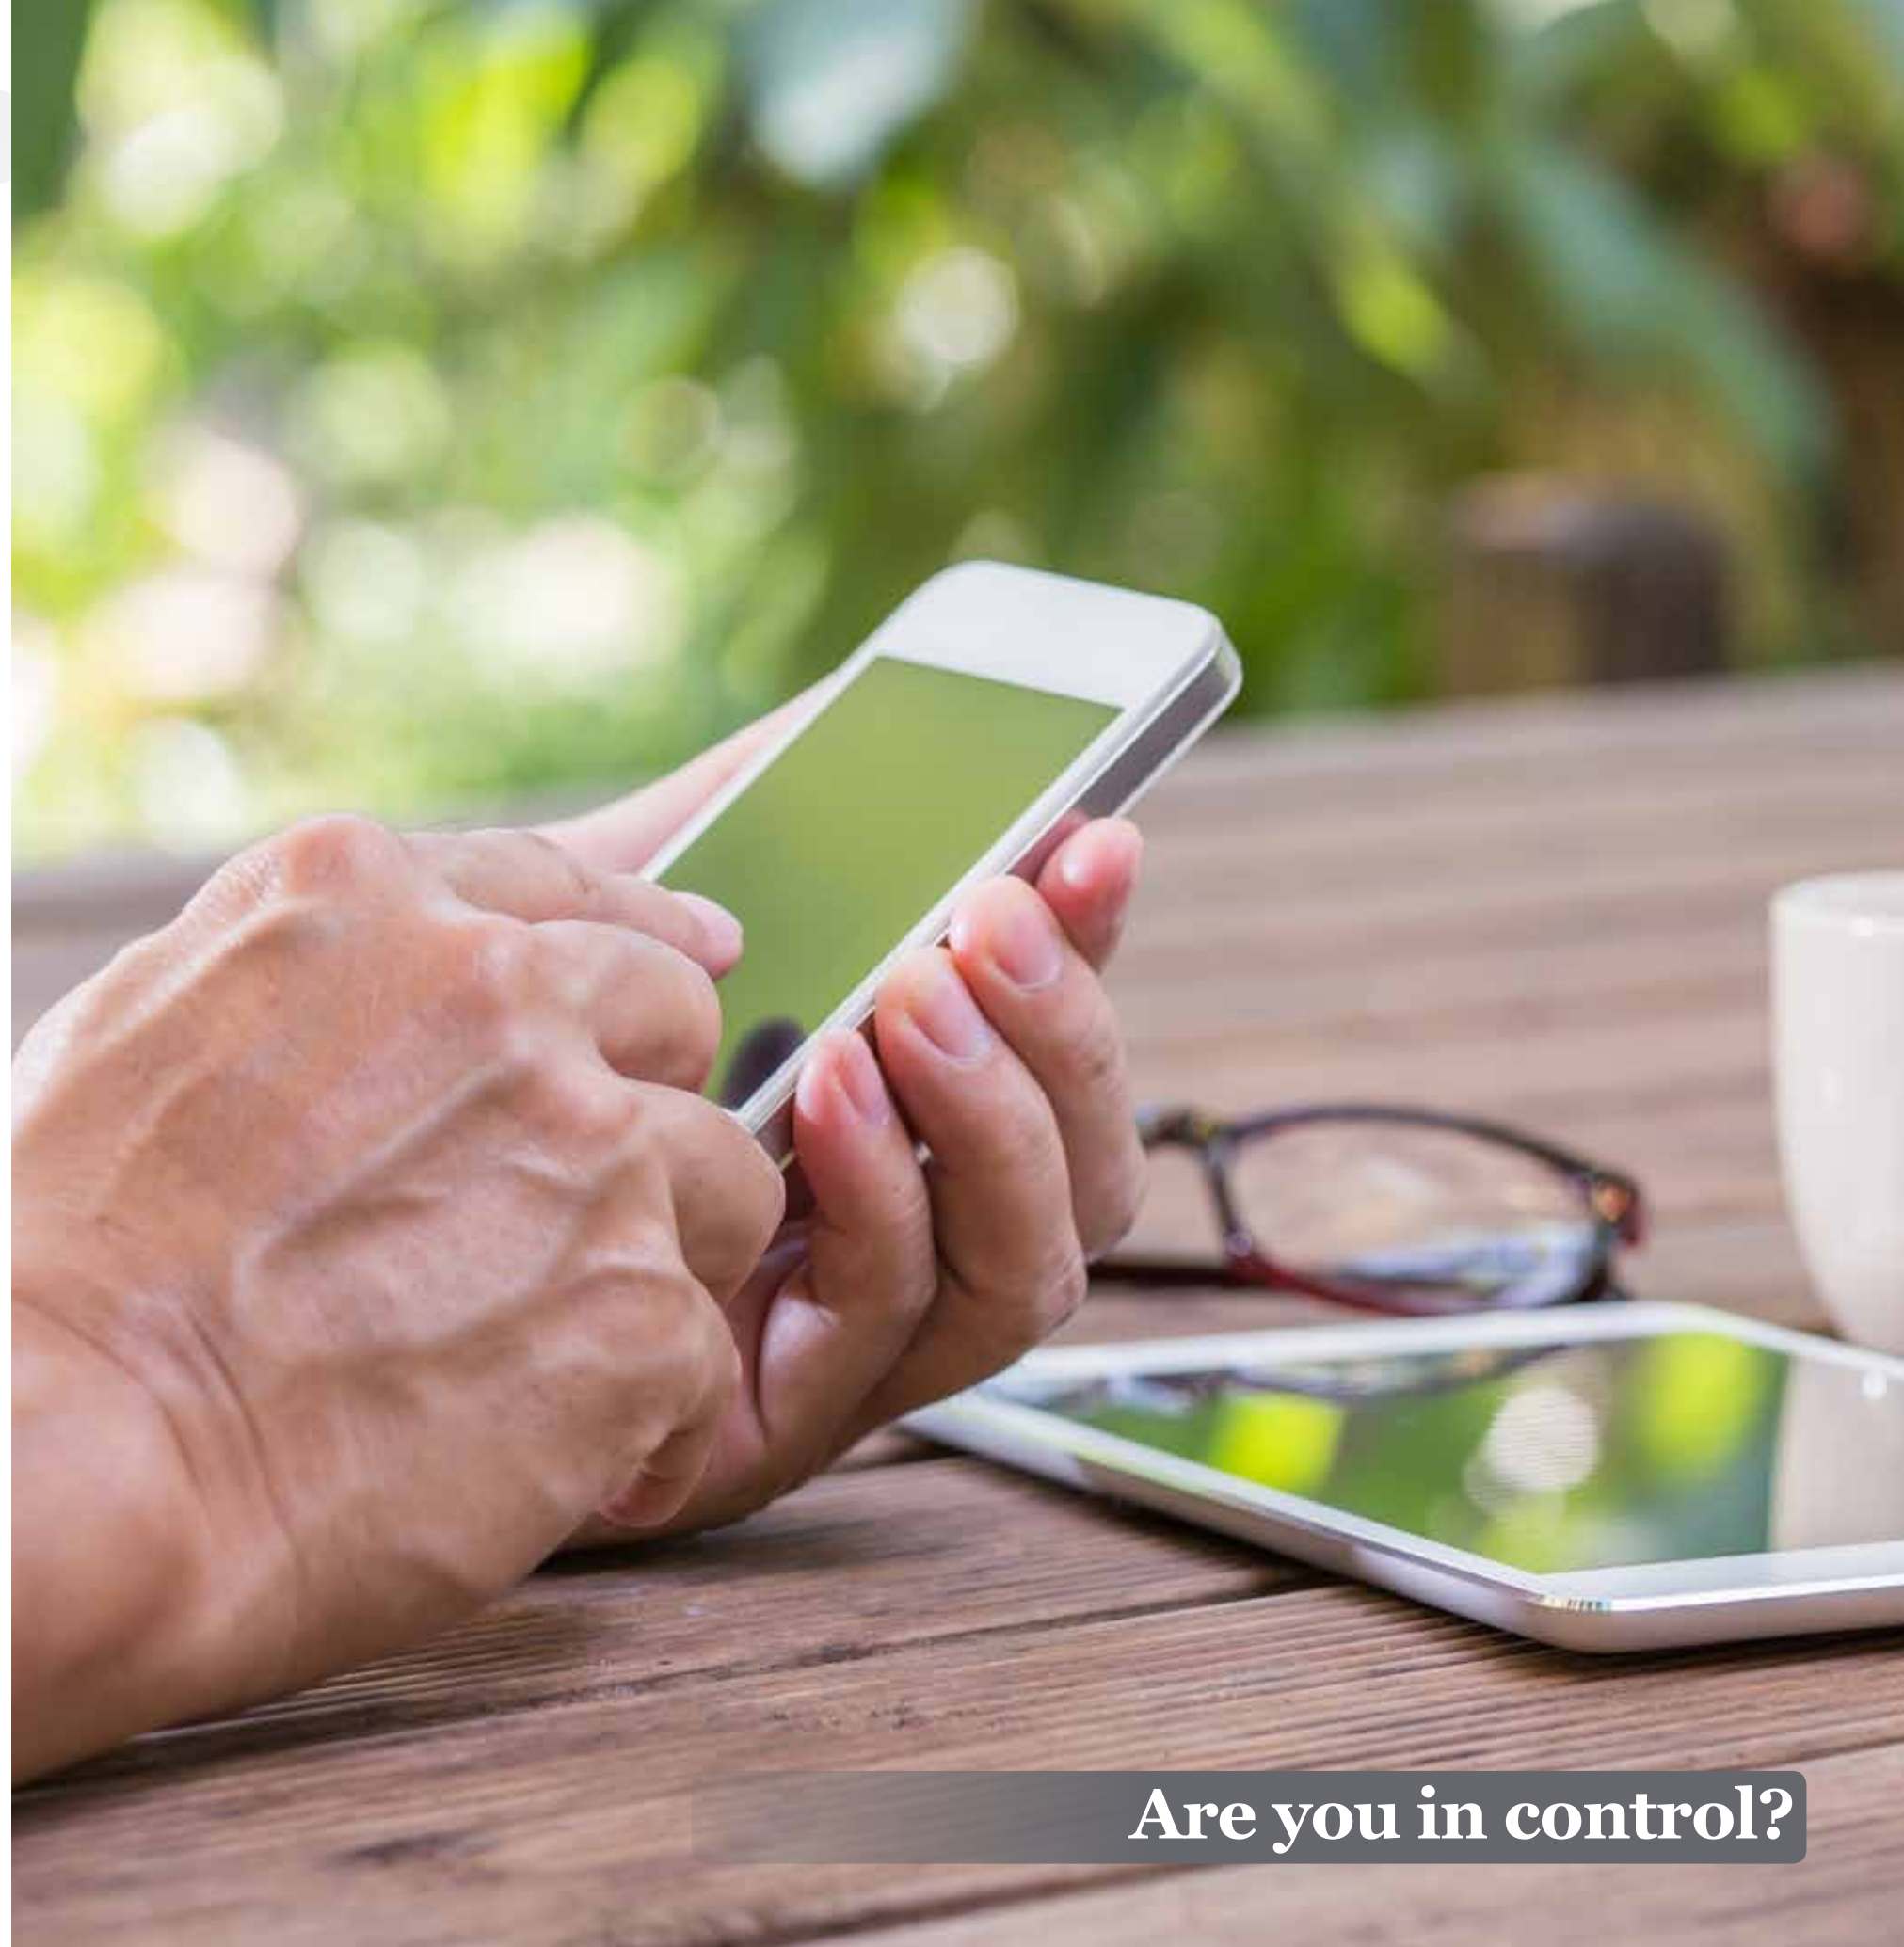

Powerful, Managed IT

Maximise efficiency by providing users with remote access. We understand businesses no longer work from one location. We have the solution.

Remote access not only increases efficiency, it allows businesses to scale whilst retaining security measures and control of your data.

Are you in control?

Stay in contact with your customers the smart way. Our telephone systems allow for easy computer and telephone integration.

We have access to a range of Voice and Data services from traditional ISDN and DSL to VoIP, Fibre MPLS and Ethernet Circuits.

Cutting-edge connections

Our consultants come from a range of industries and have gained significant experience to allow them to benefit the growth and development of any organisation.

If you're looking for technology advice or project management, you'll find that our team of consultants can help. Our consultants combine technical skills with a thorough understanding of business processes.

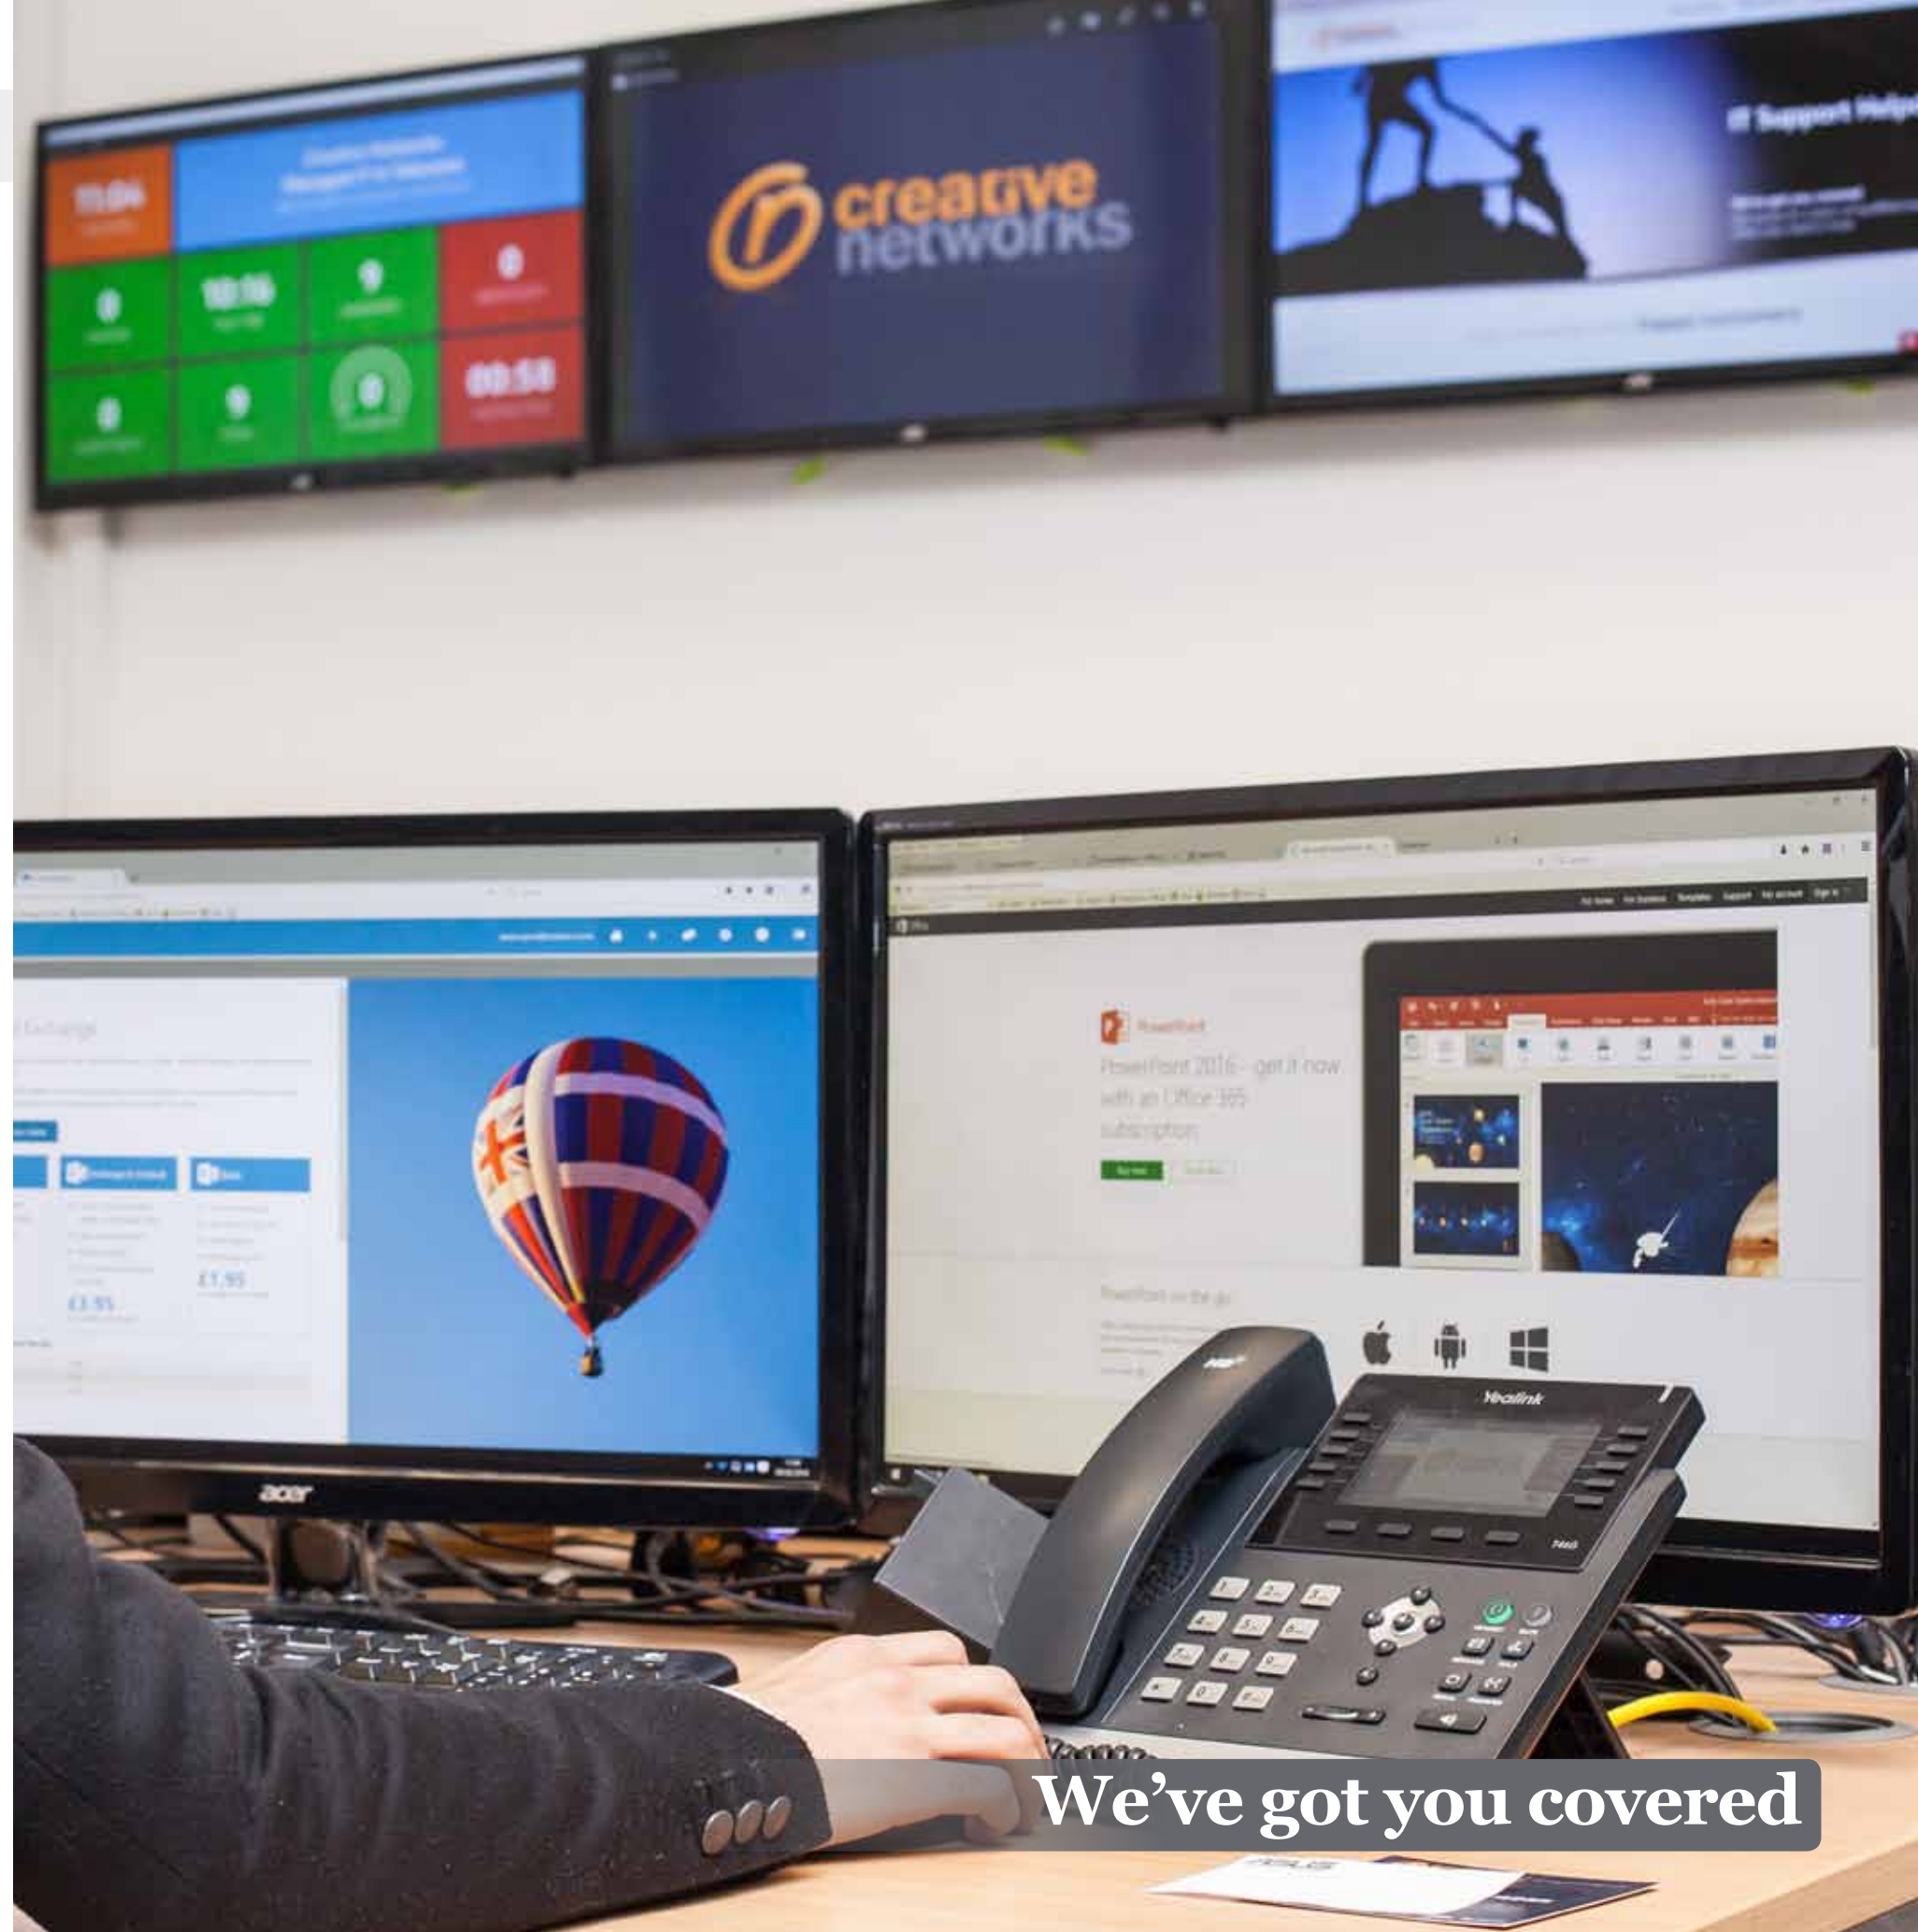

Your success is our priority

Get access to a team of qualified engineers when you need it most. We offer proactive monitoring to get to the problems before you do.

Creative Networks operates a manned helpdesk and operates its own internal SLA's to ensure our services exceed your requirements. This allows our clients to remain focused without the hassle and worry of support.

We've got you covered

A timeline graphic with orange dots connected by a line, set against a background of a city skyline at night reflected in water. The years 2005, 2006, 2008, 2010, 2012, 2013, 2015, and 2016 are listed along the timeline.

What do our customers say?

“ Creative Networks offer first class service at a reasonable price and we know that they are empathetic to our requirements. Communication has always been excellent and we were impressed with the response from their support service right from day one. ”
Hilton Jones Accounts

“ A major six site virtualisation project was carried out without fuss, on time and within budget. During my 30 years in IT, I would say they are probably one of the best companies I have worked with and I would have no hesitation in recommending them. ”
Robert Scott & Sons

“ Creative Networks provide a very high level specialist service without the jargon. They understand business and take on a central role making sure that the service provided to us is nothing short of excellent. ”
JSD Rail
